

REVIEWER STATEMENT

For any clarification on the terms used here, see the Definitions section below.

I hereby declare that I will not distribute to anyone the material that I will download from the web links provided by the Telematics Freedom Foundation (TFF), following the submittal of this statement, nor modify the same material except after having signed and submitted a Modifier Statement. I hereby declare not to claim to be a recipient of the said material, as meant by the license terms of predominant FLOSS licenses.

I hereby acknowledge that I, or one person trusted by me, residing within reasonable distance to The Service hosting facility, will be added to a list of people, from which 3 are elected and 3 randomly chosen, to provide independent verification of all software and hardware modifications to The Service servers.

I live within 3 hours distance from the Hosting Facility of The Service (StreetAddress
....., City, Province, Zip Code, Country))

I want to be added to a list of Registered Auditors.

Every 3 months, through preference expression functionality provided by The Service itself, all active users will be asked to nominate 3 active users as their preferred choice as Elected Auditors. The 3 active users with the highest preferences - who both have not been Elected Auditors over the last 12 months, and who accept the nomination - will be appointed as Elected Auditors. Every 3 months, through random selection functionality provided by The Service, 3 Registered Auditors will be randomly selected as Random Auditors.

Click here you want to know more about the Hosting Requirements, guaranteed to you by the Telematics Freedom Foundation, which we have devised to make your verification power, as an individual and as a groups, as concrete as we can.

Definitions

- The Work: Any code, files and documentation, whose copyright is owned by The Provider, either fully, or limited by it's being a derivative of FLOSS licensed software. It does not include code that TFF may have publicly released under a FLOSS license.
- Derivative Work: Any code, files or documentation that incorporates, is based on or is derived from, all or in part, from The Work, including those performed by The Provider.
- The Service: Any remote communication service enabled by The Work, managed by The Provider, offered to individual citizens or non-profit organizations. It may also refer to any Derivative Service.
- Derivative Service: Any remote communication service, operated by anyone, that makes use of The Work or any Derivative Work.
- The Provider: The non-profit organizations that is responsible for and manages The Service or Derivative Service. The entity fully responsible for the hosting contracts for the provision of The Service.
- "make public": It is said of The Service or a Derivative Service, when it is has over 1000 active users, for at least 3 consecutive calendar months.
- "active user": user of The Service or Derivative Service that has initiated at least 3 communications with such Service over the past calendar month.
- The Service Works: all software, compiled and source code, including The Work and Derivative Works, which is necessary to provide The Service.
